Re:

American Cellular Corporation

E911 Quarterly Report - CC Docket No. 94-102

Dear Ms. Dortch:

American Cellular Corporation and its subsidiaries, by its attorneys, hereby submit the attached E911 Quarterly Report on their progress toward and compliance with the terms and conditions of the *Order to Stay* and the Commission's E911 rules.¹

If there are any questions regarding this matter, please contact the undersigned.

Sincerely,

WILKINSON BARKER KNAUER, LLP

E911 Status – Quarterly Report CC Docket No. 94-102 February 1, 2006

Summary of Report

Pursuant to the *Order to Stay* and the Commission's Public Notice dated June 6, 2003, American Cellular Corporation ("ACC"), as a Tier II carrier, provides this E911 Quarterly Report ("Report"). The Report provides information on all Phase I and Phase II requests received by ACC, including the PSAP ID, Name, State, County, Implementation Phase, Air Interface, Date PSAP Request Made, Date PSAP Request Withdrawn, Invalid Request, Deployed, Date Deployed, Date Projected, Reasons and Comment. Detailed information regarding the requests is contained in the attached chart.

Phase I Service

ACC has received numerous requests for Phase I services and has activated service in all but a very few of these jurisdictions. ACC has worked diligently with its third-party vendor Intrado, as well as the public safety community, in coordinating Phase I deployment. ACC remains committed to working with its vendors, the PSAPs, and state and local governments, in order to deploy Phase I services in the remaining jurisdictions as soon as possible.²

Phase II Service

A. Deployment Preparation

ACC is a mid-sized carrier serving predominantly rural and suburban markets in 9 states. ACC previously relied primarily upon a TDMA-based network of base stations and switching equipment, but has since completed overlaying its TDMA network with GSM/GPRS technology. GSM technology is now operational and being used throughout ACC's network, and all switch upgrades necessary to supply Phase II services have been completed.

ACC has executed a contract with Andrew Corporation to provide the Position Determining Entity equipment for a hardware solution for Phase II and has also executed a contract with Polaris Wireless to provide a software solution for E911 Phase II. ACC considers a market as being E911 Phase II "deployed" after ACC has completed testing of the installed hardware and software with the PSAP to confirm that the PSAP is receiving latitude and longitude information in the appropriate format.

B. Phase II Requests

_

¹ See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, CC Docket No. 94-102, Order to Stay, 17 FCC Rcd 14841 (2002) ("Order to Stay"); Public Notice, "Wireless Telecommunications Bureau Standardizes Carrier Reporting on Wireless E911 Implementation," DA 03-1902 (rel. June 6, 2003).

² Note that ACC acquired numerous Kentucky markets from another carrier, but was not provided the actual date of the PSAP request at the time it acquired the markets. ACC completed Phase I deployment to those markets some time ago, but ACC has inserted the 1/1/01 date as a proxy for the PSAP request date to address formatting issues raised by Commission staff.

During the past quarter, ACC has continued to deploy the necessary software and hardware of the network-based Phase II solution from Polaris and/or Andrew in response to pending requests. ACC has received three new requests for Phase II service since the last quarterly filing from Marathon, Chippewa and Barron, WI. The status of all requests is detailed in the attachment.

To ensure that it may properly prioritize its E911-designated resources, ACC generally has requested each of these PSAPs to provide documentation pursuant to the *Richardson* criteria.³ Although ACC has not yet received a response to its request from all of these PSAPs, it is proceeding in good faith to provide Phase II capabilities in all ACC counties.

C. Deployment Issues

ACC, as a rural carrier, has numerous markets that do not have the cell site density to provide accurate Phase II information via a network-based solution. ACC has recently employed a software-based solution from Polaris in the vast majority of its markets that ACC hopes will ultimately yield more reliable results in these difficult markets. However, regardless of vendor ACC may not be able to provide accuracy results that satisfy the Commission's current view of its Phase II requirements due to cell site configuration problems, especially in markets with only one or two cell sites. As previously reported in the last quarterly report, ACC has learned from the vendor that in the Polaris-served markets, E911 Phase II service will not be available to subscribers using analog service. ACC continues to review other alternatives to provide E911 Phase II to these subscribers.

For ACC's hardware-based solution, in order to meet the Commission's network-based accuracy requirements, Andrew Corporation may need to install Angle-of-Arrival ("AOA") antennas at certain cell sites in addition to the Time Difference of Arrival ("TDOA") equipment that will be installed in individual cell sites. ACC has also been informed that installing AOA antennas may require tower modifications, lease modifications, and zoning approvals – any of which present the potential for delay.

ACC brought similar matters to the Commission's attention in its original waiver request.⁴ Accordingly, if necessary, ACC may avail itself of further waiver procedures to account for the potential market-specific shortcomings a network-based solution in its rural markets may present. The Commission has indicated that it will consider such requests.⁵

As required by the *Order to Stay*, a copy of this report is being filed with the Chief of the Enforcement Bureau, the Chief of the Wireless Telecommunications Bureau, and the Executive Directors and Counsels of APCO, NENA, and NANSA.

_

³ Revision of the Commission's Rules to Ensure Compatibility with Enhanced E911 Emergency Calling Systems, Petition of City of Richardson, CC Docket No. 94-102, Order, 16 FCC Rcd 18982, 18986-87 (2001).

⁴ See ACC Petition for Waiver of Sections 20.18(e), (f), and (h) of the Commission's Rules, CC Docket No. 94-102, at 11-15 (filed Sept. 4, 2001).

⁵ See Order to Stay, 17 FCC Rcd at 14853.
